

## Measuring – Stock Saddle

### Point A

- Measure the length of seat from fore part (being the raised portion between Pommel and facing) to inside back of seat.

### Point B

- Measure dip in seat by placing ruler or straight edge on Pommel and top of cantle. Take measurement from this ruler to lowest point of seat.

### Point C

- To measure all types of poley knee pads, place ruler in front of knee pad, take measurement from flap to highest point of knee pad .

### Point D

- To measure thigh pad take measurement from flap to highest point of thigh pad at the back.

### Point E

- To measure length of flap, take length from stirrup leather bar to bottom of flap.
